Sandbox AR

Sandbox AR is an augmented reality 'maker' app that allows students and teachers to create, share, and even inhabit virtual environments.

By placing a stage on a flat surface and adding models to create a sandbox, students create a virtual world they can experience and share.

Download on the App Store iPad Only

- Hundreds of models to add to a sandbox that cover history, the built world, science and nature, and more.
- A life size mode so students can scale up their sandbox and walk into their virtual world.
- Pre-built sandboxes exploring diverse subjects such as ancient Egypt, space exploration, road construction, and more (additional sandboxes coming soon).
- Free, pre-built lessons that educators can use to guide AR integration into classroom instruction.
